Scan QR code to confirm reference

The patient has confirmed:

- They have not experienced symptoms suggestive of a current COVID-19 infection (e.g. fever, muscle aches, headaches, vomiting or respiratory difficulties) in the last **72 hours**.
- 57 days have elapsed since the date of their positive test.
- They have fully recovered from COVID-19.
- They have not been advised to isolate due to contact with a confirmed case of COVID-19 or on the advice of any health authority.
- They have no other medical conditions which could affect their ability to travel safely.

Based upon the information provided by the patient and according to internationally accepted standards, I conclude that:

- The patient appears to have fully recovered from COVID-19 infection and are not considered infectious.
- The patient is likely to have developed natural immunity to SARS-CoV-2 coronavirus.
- There does not appear to be a reason, in relation to COVID-19 infection, why the patient should not travel.

In addition, I recommend that:

- The patient present their positive test certificate alongside this letter to confirm the date and test type.
- The patient confirm and meet the entry requirements for their destination country.
- The patient follow COVID-19 guidelines, including adhering to local guidance around isolation and testing as required.
- This certificate can be verified by scanning the QR code above.
